CONTROL PANEL

MACHINE DIMENSIONS

532 mm

1101 mm

897 mm
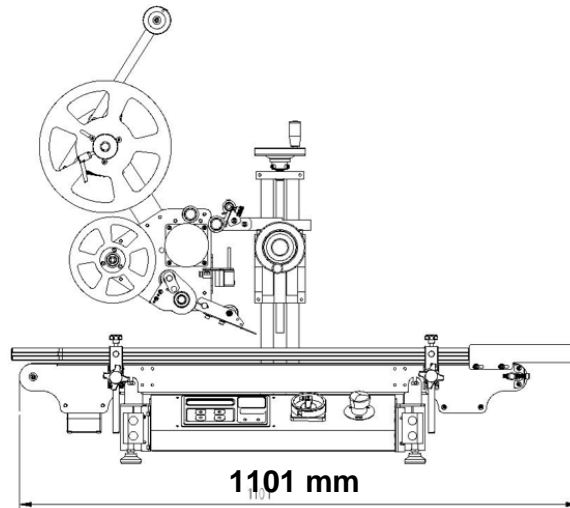

MACHINE DIMENSIONS

LABEL TYPE
Top

SPEED
Maximum Dispensing Speed:
52.5'/minute, (16m/minute),
60 cont/minute

Maximum Conveyor Speed:
52.5'/minute, (16m/minute),
60 cont/minute

DIMENSIONS
Dimensions L-W- H:
43.3" x 20" x 35"
(1100mm x 508mm x 889mm)

Maximum Label Size:
4.75" x 11.8" (120mm x 300mm)

Maximum Container Width:
6" (152.4mm)

Maximum Container Height:
4.75" (Flat 120mm)

Conveyor Width: 6" (152.4mm)
Spool Diameter: 10" (254mm)
Inner Core: 3" (76mm)

POWER
Voltage: 110/220 VAC 50/60 HZ 1 Phase

Power in KW: .400
Drive: 2 Phase Stepper Motor

NET WEIGHT
Approx 132 lbs (60 kgs)

Flexibility
- The ELF-20's standard one-button teach product and label sensors can be effortlessly adjusted for various labeling applications. And, with the manual position setting, your labels are placed accurately on the product, each and every time.
- It's easy to upgrade the ELF-20 to activate hot-foil printer controls. This integrated feature simplifies label customization and allows the hot-foil printer to work in sync with the labeler to ensure accurate code placement.
- Thanks to the user-friendly operating interface, changing to different labeling applications for various product sizes and types can be done simply and quickly.

Productivity
- A production preset function means the machine automatically stops once the predetermined quantity of products has been labeled.
- The label count feature lets you precisely track progress at any point during the production run.
- The container/production run counter lets you see the exact production number for the day.
- The ELF-20 features a battery-free microprocessor control system that maintains default settings and memory even after the machine sits idle for a long period of time. Up to five settings can be stored for future use, so you don't have to waste time re-entering the necessary information.

Accuracy
- The ELF-20's stepper motor essentially counts the "steps" necessary to reach the next label, ensuring fast, accurate label delivery.
- The ELF-20's controls are fully synchronized, ensuring that all components run at the same speed.

Practicality
- The ELF-20 can be easily and conveniently moved to other production areas, allowing for changes in production or products.
- The ELF-20 is easy to work on and to adjust, putting everything you need at your fingertips with the removal of just a few screws.
- All Pack Leader USA labelers are made of 304 stainless steel and anodized aluminum. This extremely durable metal is specially treated to guard against rusting and other effects from harsher environments.

Compliance
- All Pack Leader USA labelers are manufactured in compliance with Good Manufacturing Practices (GMP) standards and meet the strict ISO 9001 quality control procedures. So, you can have confidence undergoing required quarterly inspections from industry compliance auditors.

SPECIFICATION OF LABEL REEL

Base Paper:
Opaque or Translucent

Reel Inner Diameter:
3" (76 mm)

Reel Outer Diameter:
9.8" (250) mm

Interval of Label:
Min. 3 mm (between label)

Width of Base Paper:
Label Width + 4 mm

Width of Label:
120 H Label Head – 10~120 mm

Length of Label:
15 ~ 300 mm

Copy positions 1-4 labels wound out:

1. **Top of copy dispenses first.**

2. **Bottom of copy dispenses first.**

3. **Right side of copy dispenses first.**

4. **Left side of copy dispenses first.**
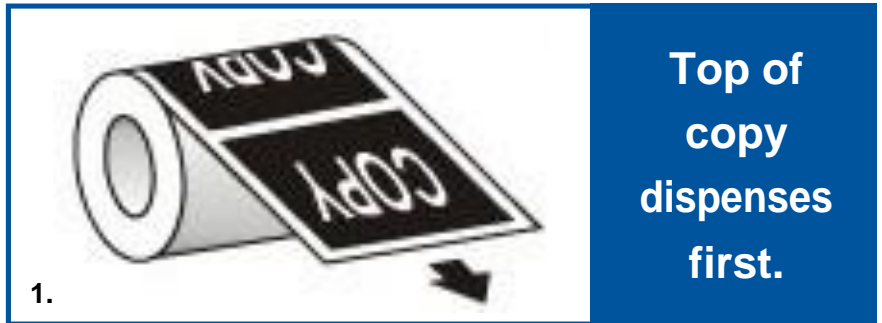

NOTE: Label gap must not exceed 5mm or the machine will not function properly.

GENERAL INFORMATION

SAFETY REGULATIONS

INSPECT BEFORE OPERATING

- Make sure the power is connected to the correct power source

- Adjust the object sensor to the correct position

- Adjust label sensor to the proper setting

DANGEROUS

SAFE

Be sure hands are completely dry before inserting the plug into the outlet. Especially, in the food industries or in wet environments.

LABEL APPLICATOR

Follow these instructions to insert the labels into the label applicator.
WITH PRINTER
WITHOUT PRINTER

1. Place the label roll on the supply plate and pass the labels around the tension roller to control over rotation of the roll.

2. Secure the labels by adding tension to the label press pad. This will prevent the labels from running loosely.

3. If a printer is installed, pass the labels between the print head and the print pad of the printer.

4. It is important for the labels to pass through the forks of the label sensor and make contact with one side. The label sensor controls the dispensing of the labels.

LABEL APPLICATOR

5. The dispensing plates peel the label from the base paper and apply it to the products.

6. The PU drive roller pulls the base paper to apply the labels. The aluminum knurled roller must be closed and locked in place with the PU roller in order to squeeze the base paper and pull effectively. See below.
OPENED   **CLOSED**   **BASE PAPER COLLECTOR**

7. Remove the collector cap on the base paper collector and wind the base paper through the collector rods. Then reinstall the collector cap to secure the collector rods and ensure proper pickup tension.
SENSITIVITY ADJUSTING OF LABEL SENSOR

1. Remove a label from the backing substrate before the sensor.

2. On the control panel, hold down "LENGTH SET" (Figure 1) until the backing substrate only is positioned in the sensor (Figure 2).

FIGURE 1   LENGTH SET

3. On the label sensor, hold down the "NORMAL" button until the green LED flashes and then turns solid (Figure 3).

4. Again, hold down "LENGTH SET" on the control panel until the next label is positioned in the sensor. If the sensor is setup correctly, the green and red LED will be on when a label is positioned in the sensor. Also, check the control panel and confirm that the counter for "LENGTH SET" is increasing and holding the count after you release the "LENGTH SET" button (Figure 4).

FIGURE 2

5. Lastly, positon the next label to dispense no more than 3mm past the end of the peel plate.
FIGURE 3

FIGURE 4
LABEL SENSOR

NOTE: This sensor cannot detect transparent labels.

NOTE: The status of the red LED and output transistors can be inverted by pressing both buttons simultaneously. When the output status has been inverted, the red LED and the output transistors will turn off when the label comes into view.

OBJECT SENSOR

The object sensor is a fiber optic infra-red sensor use to detect the presence of bottle on the labeling zone. If the sensor is not able to detect a bottle, adjust the intensity of the amplifier until the sensor is able to trigger the applicator to apply a label.

Dual Function LED Indicator

• GREEN indicates " ON" after AUTOSET routine

• Flashes twice, then turns AMBER after Excess Gain Adjustment

BEAM STATUS   OUTPUT

ALIGN

AUTOSET

Triple Function LED Indicator
• RED indicates output status. Illuminates when transistors are in the "ON" state condition
• GREEN indicates flash rate alignment
• AMBER flashes when AUTOSET™ routine is complete

Push-Button Control
• AUTOSET — Place sensor in Light State condition, then press and hold until the Alignment Indicator flashes, then release
• Press and hold to use Flash Rate Alignment Indicator
• Tap 2 times to advance excess gain
• Tap 5 times to toggle output status

1. If sensor moves too far right, the label will come out too late and will not be applied to the bottle.

2. If sensor moves too far left, the label will come out too early and possibly cause vertical wrinkles.

3. The proper position of the sensor is to make sure the label is dispensed and applies to the apex of the bottles' surface.
NOTE: The label position can be controlled through the control panel using the label position function.

PARTS ADJUSTMENTS
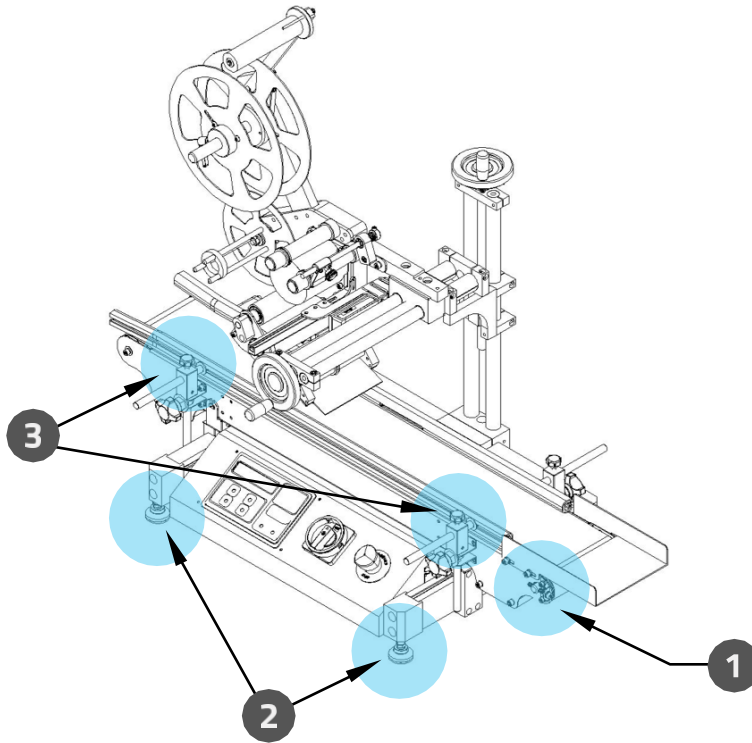

1 **Conveyor adjustment:** To adjust the tightness of the conveyor belt, turn the two screws. Turn counter clockwise to loosen and clockwise to tighten. Make sure the conveyor is centered. If not it can cause the belt to wear prematurely.

2 **Conveyor height adjustment:** Adjust the four footing screw to adjust conveyor to the appropriate height.

3 **Guide rail adjustment screws:** To adjust the width of the conveyor guides, loosen the knobs and adjust the position. Tighten after the desired width has been adjusted.

CONTROL PANEL
CONTROL PANEL LIST

NO.	DESCRIPTION	FUNCTION
1	Main Power Switch	Cut off or connect to main power supply
2	Emergency Switch	Emergency cutoff of power supply
3	Liquid Crystal Display	Displays the data
4	Length Set	To set up the label length required
5	Value	To select the numeric value to be entered/on for printer
6	Menu	To exit and scroll the menu
7	Digit	To select the digits to be changed/off for printer
8	Labeling On	To turn on conveyor and start labeling
9	Labeling Off	To stop conveyor and make settings changes

MACHINE OPERATION

MACHINE OPERATION

PLEASE FOLLOW STEPS AND INSTRUCTION BEFORE MACHINE OPERATION.

1   Connect machine to the appropriate power source and make sure the Emergency Stop is not engaged.

2   Machine adjusted to product specification range.

3   The height of label applicator adjusted in appropriate position.

5   Object sensor adjusted in right position.

6   Label Sensor is calibrated to the backing material.

7   Conveyor is clear with no extra object.

> **NOTE:** Load label roll as per instruction of the label web sticker on the applicator or see page 10.

CONTROL PANEL SETUP

LABEL LENGTH

PRE COUNT

COUNTER
PRECOUNT SETUP

1 Press menu to select "PRECOUNT" and press "DIGIT" to select the digit then press "VALUE" to set the numbers.

2 Press "MENU" to exit.

LABEL DELAY SETUP

1 Use "MENU" to select "LABEL POSITION" to change the value of the delay.

2 Use "DIGIT" to select the digit that you want to set and press "VALUE" to select value. The higher the number the longer the delay.

> **NOTE:** The object sensor is set on delayed mode for wrap around so the "LABEL POSITION" function must be used to correct label placement.

3 When the "LABEL POSITION" is set to "00" the label applicator will dispense immediately.

4 Press "MENU" to exit.

CONTROL PANEL SETUP

LABEL HEAD SETUP

1 Press "VALUE" to turn the label head ON and press "DIGIT" to turn the label head OFF.

SPEED SETUP

1 Press "VALUE" to select speed 1-4.

PRINTER SETUP

1 Use "MENU" to select "PRINTER." Press "DIGIT" to turn "OFF" and press value to turn "ON." Press menu to exit.

MEMORY SETUP

1 Turn off "LABELING," Press "MENU" and select "MEMORY STORE" then select memory location by using "VALUE." Store the data by pressing "LABEL LENGTH." All parameters of label length, batch counter and delay will be stored into the assigned memory slot.

CONTROL PANEL

DANGER
- Do not bump or press heavily on control panel.

- Lightly press on any point inside the control panel to input data.

- Lightly press buttons with a finger to select appropriate button (do not use a tool or sharp object).

DO NOT USE TOOL OR SHARP OBJECT

- Use a soft cleaner or wet cloth to clean the surface of the control panel.

- Operators are not advised to open the control panel to change any spare parts. if so, we are not responsible for any of the damages or injuries.

TROUBLE SHOOTING

PROBLEM 1: LABEL LENGTH CANNOT BE SET

A. LABEL SENSOR WAS NOT ADJUSTED PROPERLY

1. Inspect the condition of the label sensor. Please refer to "Sensitivity adjusting instruction of label sensor" section.

2. If label length still cannot be set, replace the label sensor.

B.S TEPPING MOTOR DOES NOT WORK

1. Inspect that the wires are properly connected. If the wires are not connected, please connect them and reset the labeling applicator.

2. If the problem is not in the wiring, please contact **Pack Leader USA**.

PROBLEM 2: MORE THAN ONE LABEL IS DISPENSED AT A TIME

A. SENSITIVITY OF LABEL SENSOR

1. The sensitivity of label sensor is too weak; as a result, the sensor cannot (or sometimes cannot) detect the label.

2. Reset the sensitivity of label sensor. (Refer to sensitivity adjusting instruction of label sensor)

B. LABEL LENGTH WAS SET TOO LONG

1. Please reset the label length.

PROBLEM 3: LABEL WON'T DISPENSE

A. OBJECT SENSOR RESPONSE

1. Inspect that the object sensor responds on the product. If not, adjust the sensitivity of the object sensor until the label comes out.

2. If the label still won't dispense by adjusting the object sensor, inspect the wire or replace with a new one.

B. THE "LABELING" ICON OF LABELING SET WAS NOT TURNED ON

1. Please Turn "On" the labeling set icon.

C. THE FUSE OF THE STEPPER MOTOR DRIVER IS BURNED OUT

1. Replace with a new fuse.

D. THE WIRE OF THE STEPPING MOTOR OR MOTOR DRIVER IS DAMAGED

1. Please notify maintenance technicians.

TROUBLE SHOOTING

PROBLEM 4: LABEL IS SLANTING

A. BOTTLE IS NOT EVEN

B. LABEL IS DIAGONALLY PLACED ON THE BASE PAPER WHEN THE LABELS ARE MADE

C. THE SLANTING OCCURRED WHEN LABELING. THIS IS CAUSED WHEN THE PEEL PLATE IS NOT SQUARE TO THE PRODUCT.

> **NOTE 1:** If problem is found in A or B, you need to improve the bottle or label.

> **NOTE 2:** If the problem is found in C, you need to adjust the applicator peel plate to the appropriate position.

PROBLEM 5: NO SCREEN DISPLAY

A. CHECK IF POWER IS TURNED ON

B. CHECK IF THE CONNECTION WIRE IS NOT CONNECTED OR DAMAGED

PROBLEM 6: LABEL WILL NOT STICK ON THE PRODUCT

A. LABEL COMES OUT TOO LATE

1. Decrease the value of the label peel delay. If value is set to 0 move the physical location of the object sensor to the left.

B. LABEL DOES NOT DISPENSE SMOOTHLY

1. Check whether the PU drive roller with a lock in the label applicator is locked. If not, lock it. If labels still do not dispense smoothly when locked, check if PU drive roller is locked too tightly by turning the PU drive roller. If not, loosen the screw in the lock of the PU drive roller and adjust backwards slowly until it is tight enough when you lock it again.

C. STEPPING MOTOR

1. If stepping motor is not running properly, check the wires, belt and other spare parts to see if they are damaged.

2. Replace stepping motor if defective.

D. PRODUCT & LABEL

1. Check whether the product surface is too wet or slippery or label has incorrect adhesive.

TROUBLE SHOOTING

PROBLEM 7: WRINKLES OR BUBBLE OCCUR WHEN LABELED

A. LABEL COMES OUT TOO EARLY

1. Move the object sensor left to an appropriate position to test labeling. If the label still comes out too early, move to step 2.

2. Increase the value of the label peel delay in LABELING MODE menu.

B. THE POSITION OF LABEL IS NOT ACCURATE

1. Check whether the front of the dispensing plate is square.

2. The label sensor is in an unusual position. Please inspect the label sensor or replace with a new one.

3. The gap between the labels are not consistent.

C. BOTTLE CONDITION

1. Surface of product is not consistent.

D. BACK PRESSURE PLATE

1. Back pressure plate is too tight

PROBLEM 8: CONVEYOR DOES NOT WORK

A. WILL NOT RESPOND ON THE TOUCH SCREEN

1. Please re-start the machine.

2. After restarting the machine, if the conveyor still does not work contact **Pack Leader USA**.
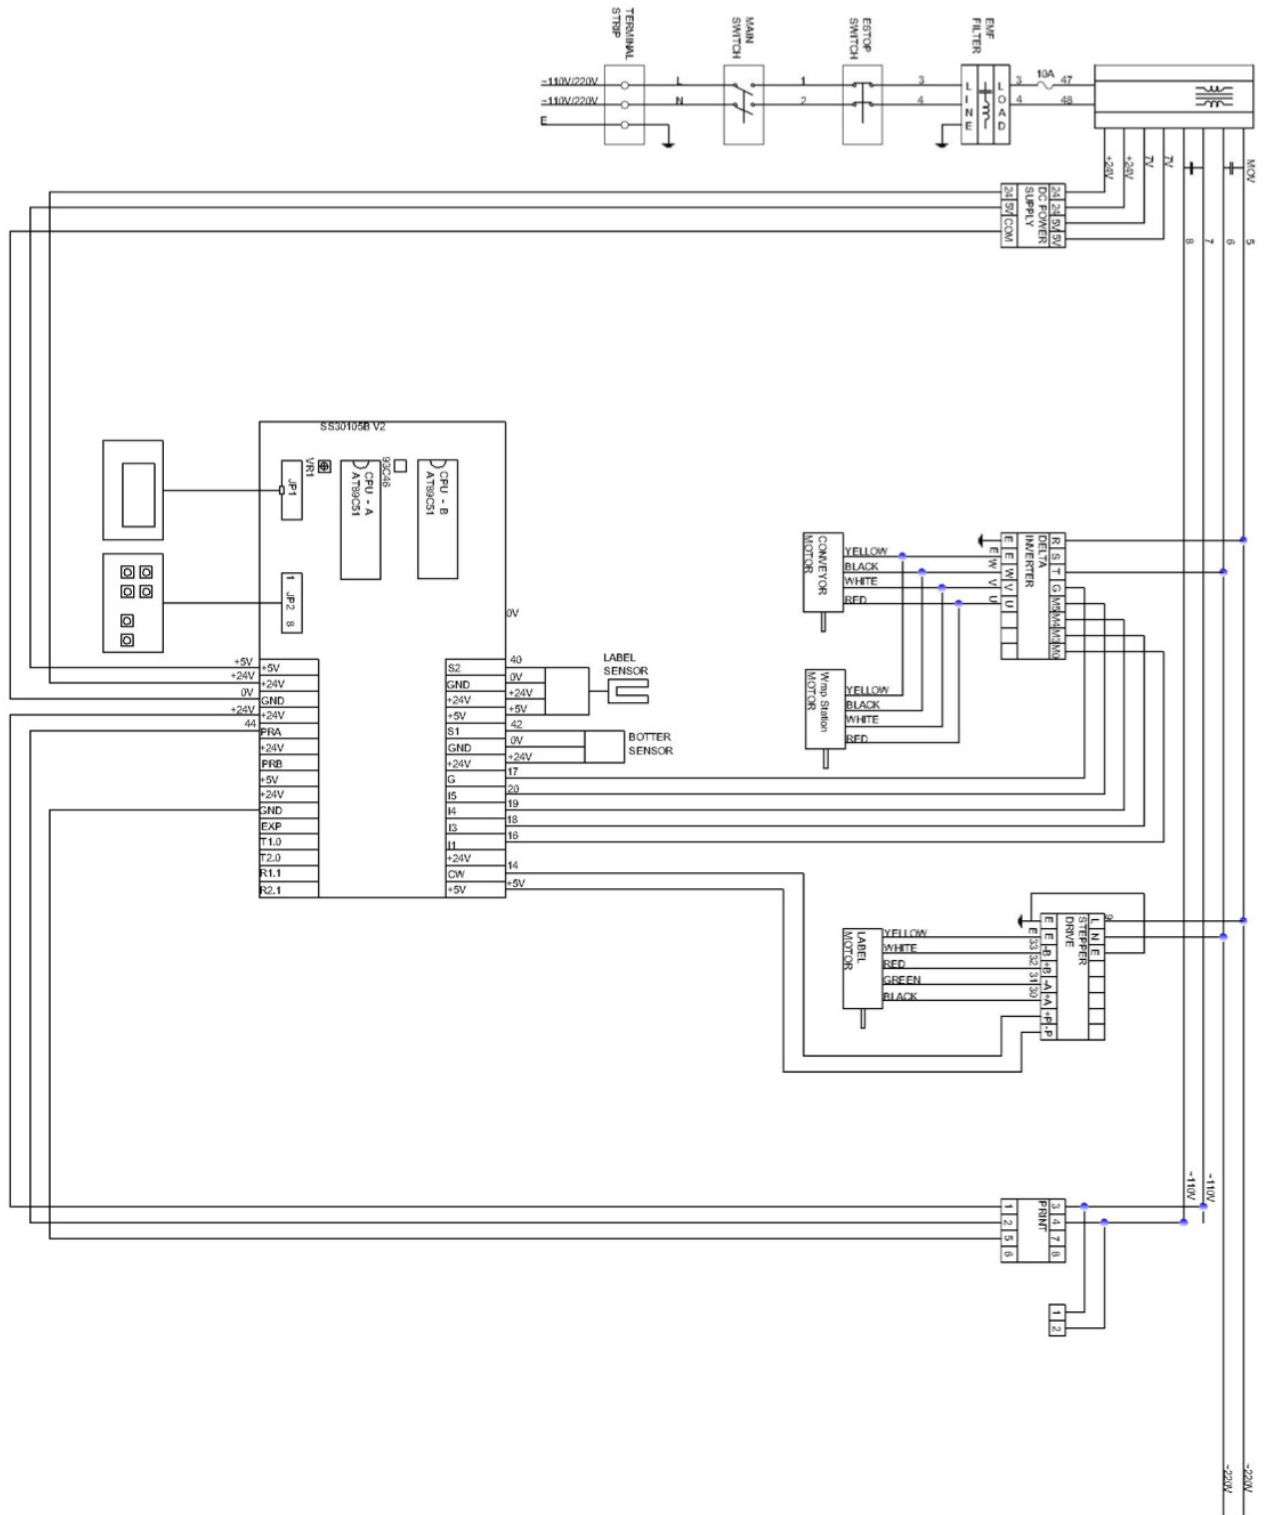

B. CONVEYOR MOTOR

1. Gearwheel belt is damaged or loose.

2. Check wires for damage.

APPLICATOR ADJUSTMENT ASSEMBLY
APPLICATOR ADJUSTMENT ASSEMBLY PART LIST

NO.	DESCRIPTION	PARTS NO.	QTY.
1	Applicator Up/Down Adjustment Assembly	AA1-ELF	1
2	Applicator Front/Rear Adjustment Assembly	AA1-ELF	1
3	Labeling Applicator Adjustment Base	ELF1050501-024	1
4	Self Run Bearing	5TDU-LBF2015	4

# APPLICATOR UP/DOWN ADJUSTMENT ASSEMBLY
APPLICATOR UP/DOWN ADJUSTMENT ASSEMBLY PART LIST

NO.	DESCRIPTION	PARTS NO.	QTY.
1	Mounting Base Of Hand Wheel	AA1-ELF-014	1
2	Screw Rod M16300	AA1-ELF-007	1
3	Nylon Washer	2FN2-101610	6
4	Applicator Shaft Clamp	AA1-ELF-002B	4
5	Right Angle Seat	AA1-ELF-009	2
6	Transfer Sleeve Of Shaft	AA1-ELF-003	2
7	Hand Wheel	QRGX-KRA100CB65	1
8	Socket Head Cap Screws	XNJW-M512	2
9	Socket Head Cap Screws	XNJW-M625	8
10	Socket Head Cap Screws	XNJW-M640	4
11	Socket Head Cap Screws	XNJW-M635	4
12	Sliding Shaft	AA1-ELF-016	2
13	Screw Base	AA1-ELF-010	1
14	Socket Head Cap Screws	XNJW-M620	2

APPLICATOR FRONT/REAR ADJUSTMENT ASSEMBLY

APPLICATOR ADJUSTMENT ASSEMBLY PART LIST

NO.	DESCRIPTION	PARTS NO.	QTY.
1	Hand Wheel	QRGX-KRA100CB65	1
2	Socket Head Cap Screws	XNJW-M512	2
3	Mounting Base Of Hand Wheel	AA1-ELF-014	1
4	Sliding Shaft D20400	AA1-ELF-004	2
5	Applicator Sliding Base	AA1-ELF-001B	1
6	Self Run Bearing	5TDU-LBF2015	4
7	Socket Head Cap Screws	XNJW-M620	2
8	Nylon Washer	2FN2-101610	6
9	Screw Rod	AA1-ELF-007	1

CONVEYOR

CONVEYOR ASSEMBLY
CONVEYOR ASSEMBLY PART LIST

NO.	DESCRIPTION	PARTS NO.	QTY.
1	Conveyor Plate	CV1-ELF-001C	1
2	Conveyor Driven Pulley Assembly	See page 54	1
3	Conveyor Driving Pulley Assembly	See page 53	1
4	Conveyor Motor Assembly	See page 52	1
5	Conveyor Belt 150W*2040L	T2EW-150W2040LA	1
6	Heater Box Fixed Rod	CV1-ELF-020	2
7	Bridging Plate	CV1-ELF-012	1
8	Tension Adjustment Block	CV1-ELF-008	4
9	Spacing Pillar	CV1-ELF-010	1
10	Guide Rail Fixing Base	CV1-ELF-011	1
11	Locking Screw Q339	51WR-Q339	8
12	Guide Rail - 1	GR1-ELF20-001	1
13	Guide Rail - 2	GR1-ELF20-002	4
14	Guide Rail Up & Down Adjusting Rod	51CX-UD-D12140	2
15	Guide Rail Front & Back Adjusting Rod	51CX-K-PIN-150	4
16	Guide Rail Front & Back Positioned Rod	GR1-PL501-009	4
17	Star Knob	51WR-606025M615	2
18	Timing Belt 120XL-050	T2Q2-120XL050	2

CONVEYOR MOTOR ASSEMBLY
CONVEYOR MOTOR ASSEMBLY PART LIST

NO.	DESCRIPTION	PARTS NO.	QTY.
1	3 Phase Stepper Motor	A2EU-51K40GNST	1
2	Gear Reducer 5GN15K	A2RG-5GN15K-1	1
3	Double Head Round Keys	RGM-4425	1
4	Pulley	CV1-ELF-017	1
5	Socket Set Screw	XN5Z-M45	1
6	Spring Washer	2FWO-M6	4
7	Socket Head Cap Screws	XNJW-M675	2
8	Socket Head Cap Screws	XNJW-M685	2

CONVEYOR DRIVING PULLEY ASSEMBLY
CONVEYOR DRIVING PULLEY ASSEMBLY PARTLIST

NO.	DESCRIPTION	PARTS NO.	QTY.
1	Conveyor Driving Pulley	CV1-ELF-002B	1
2	Bearing 6202 ZZ	5TGH-6202ZZ	2
3	Conveyor Driving Pulley Cover	CV1-ELF-003B	1
4	Gear	CV1-ELF-004	1
5	Bolt	XNAW-M320	4
6	Conveyor Driving Pulley Shaft	CV1-ELF-005B	1
7	S-Ring S15	DCSV-S15	2
8	Bolt	XNAW-M315	4

CONVEYOR DRIVEN PULLEY ASSEMBLY
CONVEYOR DRIVEN PULLEY ASSEMBLY PARTLIST

NO.	DESCRIPTION	PARTS NO.	QTY.
1	Conveyor Driven Pulley	CV1-ELF-007B	1
2	Bearing 6202ZZ	5TGH-6202ZZ	2
3	Conveyor Driven Pulley Shaft	CV1-ELF-006B	1
4	S-Ring	DCSV-S15	2
5	Pulley Adjustment Block	CV1-ELF-009	2

FOOT STAND

FOOT STAND ASSEMBLY
FOOT STAND ASSEMBLY PART LIST

NO.	DESCRIPTION	PARTS NO.	QTY.
1	Top Cover	CS1-ELF-006	1
2	Control Box Panel Fixed Plate (Left)	FT1-ELF-022	1
3	Control Box Panel Fixed Plate (Right)	FT1-ELF-021	1
4	Panel	CS1-ELF-002B	1
5	Base	CS1-ELF-001C	1
6	Stand Connector - Front Left	FT1-ELF-032	1
7	Stand Connector - Front Right	FT1-ELF-033	1
8	Plug	QVDG-HP13	12
9	Pad	51WR-NS401285	4
10	Stand Connector	FT1-ELF-014C	2
11	Conveyor Fixed Supporter (Outer)	FT1-ELF-017C	4
12	Conveyor Supporter - Left	FT1-ELF-024E	2
13	Conveyor Fixed Supporter (Inner)	FT1-ELF-018D	4
14	Back Stand Connector	FT1-ELF-034C	1
15	Aluminum Extrusion	FT1-ELF-035	2
16	Conveyor Supporter - Right	FT1-ELF-023E	2
17	Supporter Connecting Base	FT1-ELF-025C	1
18	Supporter Connecting Base (Inner)	FT1-ELF-026C	1
